

CommercelQ Take-Home Assignment

Skill: Competitor Content Intelligence (for Ally)

Goal: Build a new skill for Ally, CommercelQ's AI teammate, that compares a client SKU's content to competitors' SKUs, highlights improvement areas, and generates ready-to-use content recommendations aligned with Amazon's guidelines.

What the Skill Should Do

Inputs:

- The user can select any product (SKU) from the provided data

Outputs:

- A report comparing the selected SKU with other similar (competitor) items on:
 - title length, bullet points clarity, description, and any other attributes
- Top 3 suggested edits to the SKU.
 - Edits should be compliant with the Amazon guidelines (also shared).
 - Also, provide inline competitor references and citations/links to the Amazon content rules used.
- When the user approves the changes, produce a final Markdown summary

Deliverables

- Loom walkthrough (3–6 min) — demo & reasoning
- Repo/zip containing:
 - README: setup, assumptions, product brief
 - Prompts + example I/O

Guidelines

- Expected effort: ~8 hours
- Use any public APIs or LLMs
- Document your prompts clearly

- Think about important edge cases (don't have to solve them in your code)

Evaluation Criteria

For **technical** roles:

- Depth of AI understanding
- Designing technical architecture
- Hands-on coding
- Quick prototyping (using AI tools such as Cursor)
- Clear communication

For **product** roles:

(Don't treat this as a purely technical assignment; it's meant to assess your Product skills)

- Product vision and strategy
- Product design and user experience
- AI understanding
- Basic understanding of technical architecture
- Quick prototyping (using AI tools such as Lovable or Cursor is allowed. However, don't let them get in the way of showcasing the depth of your AI understanding)
- Crisp communication

CIQ Will Share

1. Client SKUs CSV
 - a. sku_id, title, bullets, description, image_urls, brand, category
2. Amazon Content Guidelines PDF/MD
 - a. Assume the same content guidelines apply to all categories (eg, Pet supplies, Beverages, etc).
 - b. Your recommendations should follow the guidelines. After that, it's up to the client if they want to deviate from it.
